

I must voice my opinion about K-love. K-love is one of the only radio stations my family and I listen to in our home and car. Since we don't watch TV it is a huge part of our life. It has been a real life saver in times of trouble with encouraging songs and messages. I would be heart broken to loose it. I am also aware of how it has touched the lives of many others through radio messages from people who chose not to continue with suicide plans after coming across the station and the right song was on at the right time. If K-Love were to be replaced I believe it would have a terrible effect on the community around me because I happen to know that what we fill our brains with is what will fill our hearts and minds, thus dictate our actions. Please don't remove K-Love from the radio.
